

1600 SERIES

**FILL-RITE**

**SIMPLE. RELIABLE. MOBILE.**

**PORTABLE FUEL TRANSFER PUMP**

The FR1600 Series provides the portability you need paired with the flexibility for transferring diesel fuel from drums and totes into smaller equipment. With a capacity of up to 10 GPM, this 12V DC fuel transfer pump comes ready out of the box and is compatible with a variety of petroleum diesel fuels, biodiesel up to B20, and antifreeze. The pump head is engineered of cast-iron construction to provide heavy-duty performance that is affordable yet rugged enough for daily use. Weighing in at under 8 pounds, the FR1600 Series can be easily transportable by hand and can be held during operation. This low-volume fuel transfer pump is able to deliver your needs effectively regardless of your application.
